

UNIVERSITY OF KANSAS - LAWRENCE CAMPUS

PART I - General Laboratory Safety Plan

Section 6) Laboratory Hazardous Materials Waste Management

6.1) Introduction

Hazardous materials must be disposed of properly to protect human health, safety, and the environment. Many materials being used at the University present some type of hazard (biological, chemical, physical, or radiation) and specific disposal procedures are required. Therefore, all materials being used by a laboratory or laboratory-related unit shall be disposed in accordance with the University of Kansas Hazardous Materials Waste Management Program.
